

BRO UNIVERSITY

Website Development Requirement Document

1. Vision & Strategic Roadmap

BRO University will initially launch with a dedicated NEUROSCIENCE School as the foundation vertical. After achieving sufficient admissions, funding traction, and brand authority, two additional schools will be launched: Artificial Intelligence and Semiconductor Sciences. The website must reflect this phased growth model clearly and strategically.

2. Phase 1 – Neuroscience (Primary Launch Focus)

- Homepage focused entirely on Neuroscience positioning.
- Programs page (Bachelors, Masters, PhD – Future Ready Curriculum).
- Research & Innovation page.
- Admissions page with inquiry form.
- Faculty (Founding Team placeholder if required).
- Investor / Vision page explaining expansion roadmap.

3. Future Phase Architecture (AI & Semiconductor)

The website must be architected in a scalable manner so that AI and Semiconductor Schools can be added seamlessly without redesigning the full system. Navigation should include: - Neuroscience (Active) - AI (Coming Soon – Vision Section) - Semiconductor (Coming Soon – Vision Section) The design must subtly communicate that BRO University is building a multi-disciplinary technology ecosystem.

4. UI / UX Requirements (Investor-Grade Design)

- Ultra-premium, futuristic, minimal yet powerful design.
- Dark + Elegant academic theme (not childish or generic tech template).
- Strong typography hierarchy for authority positioning.

- High contrast CTAs for Admissions & Investor Interest.
- Smooth scrolling with subtle motion animations.
- Mobile-first responsive design.
- Fast loading, optimized performance.

5. Custom Illustrations & Vector Graphics (From Scratch)

All illustrations, vector graphics, neuroscience visuals, brain graphics, neural networks, AI elements, and semiconductor imagery must be designed from scratch. No copied illustrations. No template marketplace graphics. No stock-heavy identity. The visual system must be unique intellectual property aligned with BRO University branding.

6. Homepage Structure (Neuroscience Launch Version)

- Hero Section – Visionary Headline + Neuroscience Visual.
- Why BRO University – Differentiation Section.
- Neuroscience Programs Overview.
- Research & Innovation Focus.
- Future Schools Preview (AI & Semiconductor – Coming Soon).
- Investor Call-to-Action.
- Admissions CTA Section.

7. Technical Requirements

- Custom CMS or scalable framework.
- SEO optimized structure.
- Secure hosting recommendation.
- Analytics integration.
- Future student portal compatibility.
- Lead capture automation readiness.

8. Branding Positioning

BRO University must be positioned as: - Elite - Research-driven - Innovation-centric - Future-focused
The design must attract: - High quality students - Global faculty - Strategic investors - Research collaborators

9. Deliverables Expected from Developer

- Complete UI/UX Design System.
- Custom Illustration Package.
- Fully Functional Responsive Website.
- Admin Dashboard.
- Future Scalability Structure.
- Brand Style Guide (Colors, Typography, Visual Language).
